Profile

Full Stack Developer passionate about creating seamless, user-centric web experiences. Proficient in React for building intuitive interfaces and Django for crafting robust server-side functionalities. Adept at problem-solving, collaborating in cross-functional teams, and eager to bring a fresh perspective to innovative projects. Excited to contribute to the success of forward-thinking organizations.

Education

09/2019 – 11/2024	**BENG Computer Engineering** *University of Benin*

Professional Experience

05/2023 – present
Remote, USA

Frontend Developer
Systrix
- Built frontend app using React.js and React Hooks
- Collaborated with the backend developer to design and consume C♯ and .NET RESTful APIs, ensuring seamless integration between the frontend and backend systems.
- Developed and maintained reusable UI components, reducing redundancy in code and accelerating the development of new features.
- Used git as a version control and also in contributing to the code base
- Conducted cross-browser compatibility testing, identifying and resolving issues to ensure a consistent user experience across all major browsers.

01/2023 – present
Remote, Nigeria

Frontend Developer
Ez Solutions Limited
- Built frontend app using React.js and React Hooks
- Collaborated closely with the UX/UI designer to transform wireframes and design mockups into functional and visually appealing user interfaces.
- Collaborated with the backend developer to design and consume Node.js RESTful APIs, ensuring seamless integration between the frontend and backend systems.
- Used redux tool-kit for state management
